### **Highlights and innovations at ISH 2019 – with SAUTER Intelligence Inside**

From 11-15 March 2019, it was that time again. ISH, the world's leading trade fair for water, heating and climate, held every two years in Frankfurt, once again offered around 200,000 visitors many inspiring impressions on topics such as sustainable climate and building technology and innovative building solutions.

This year, our SAUTER trade fair stand in hall 10.2 A61 was all about digitalisation. Customers, visitors and interested parties experienced SAUTER under the motto "Intelligence Inside", with a new stand design and many impressive new SAUTER hardware and software products such as the Smart Actuator, the eValveco dynamic flow control system, our Mobile Building Services and further SAUTER app and cloud solutions.

A particular highlight of this year's trade fair presentation was the world première of our new SAUTER modulo 6 building automation system, which is distinguished by its outstanding performance, intuitive operation, backwards compatibility, cloud- and IoT-capability, maximum connectivity and flexibility, all while meeting the highest security requirements.

Many visitors also enjoyed one of our entertaining presentations at the SAUTER stand, moderated by our own Martin Hall, who informed our audience in a spectacular show about the company, our highlights for this year's trade fair and the topics of continuity, digitalisation and SAUTER 4.0.

We would also like to take this opportunity to mention our current Roadshow, which will be focussing this year on digitalisation, building automation 4.0 and our new SAUTER modulo 6 building automation system. We will be writing separately soon to notify you of the exact dates and locations.

You will also find a summary of our trade fair topics and further information on our innovations and on SAUTER modulo 6 on our **landing page for ISH 2019** (link <https://ish.sauter-cumulus.de>). Our sales representatives from the SAUTER subsidiaries will naturally continue to be at your disposal for any questions.

### **About SAUTER**

*As the leading provider of solutions for building automation technology in Green Buildings, SAUTER ensures good climate conditions and a sense of well-being in sustainable environments. SAUTER is a specialist in developing, producing and marketing products and systems for energy-efficient total solutions, and offers a comprehensive range of services to ensure the energy-optimised operation of buildings. Our products, solutions and services enable high energy efficiency throughout the entire life-cycle of a building – from planning and construction through to operation – in office and administrative buildings, research and educational facilities, hospitals, industrial buildings and laboratories, airports, leisure facilities, hotels and data centres. With over 100 years' experience and a track record of technological expertise, SAUTER is a proven system integrator that stands for continuous innovation and Swiss quality. SAUTER provides users and operators with an overview of*

*energy flows and consumption, and of the development of the costs involved.*
