

Performance and efficiency in HVAC automation.

The new SAUTER vialoq AVM 1000 is characterised by simple handling and powerful performance.

This energy-saving actuator is very quiet and extremely economical to run. The gears are durable and robust in accordance with the strict Swiss standards of quality.

The new SAUTER vialoq AVM 1000 valve actuator features

- ... 1000 N of thrust
- ... a patented, fully automatic valve adaptation mechanism
- ... a plug-in cable module
- ... load-based cut-off
- ... maintenance-free gears with optimised gear geometry
- ... steel threaded spindle and gearbox base-plates
- ... a built-in travel measurement system to maintain the position, even if the power is interrupted
- ... many different adapters for mounting on third-party valves

The SAUTER vialoq AVM 1000 is...

- ... **efficient:** Powerful stroke, minimum energy consumption
- ... **solid:** Sturdy gears, quiet operation, Swiss quality
- ... **easy:** Quick fitting: modular plug-in electronic module, automatic patented valve coupling
