

EY-LO 625...670: Local operating and indicating units, modu625...670

How energy efficiency is improved

SAUTER EY-modulo 5 technology: modular, fast and universal

Features

- Part of the SAUTER EY-modulo 5 system family
- Pluggable elements for direct operation/indication of modu525 automation station (AS) and novaLink and I/O modules
- Direct operation via switches/sliders (as per EN ISO 16484-2:2004 "Local override and indicating units")
- Separate indicator for manual operation
- Ready for use without parameterising

EY-LO670F001

Technical data

Power supply

Power supply	From AS, novaLink and modu5** I/O module
--------------	--

Parameters

Factory setting	All switches set to «A» (Auto)
-----------------	--------------------------------

Ambient conditions

Operating temperature	0...45 °C
Storage and transport temperature	-25...70 °C
Admissible ambient humidity	10...85% rF no condensation

Interfaces and communication

Connection for I/O module / AS or lowering frame	Spring contacts, 9-pin
--	------------------------

Standards and directives

Type of protection	IP 30 (EN 60529)
Protection class	III (EN 60730-1) PELV
Environment class	3K3 (IEC 60721)

CE conformity as per

EMC directive 2004/108/EC	EN 61000-6-1, EN 61000-6-2, EN 61000-6-3, EN 61000-6-3
---------------------------	--

Overview of types

i Power consumption: on primary side of base station (230 V~)

i Current consumption: supply via base station

Type	EY-LO625F001	EY-LO630F001	EY-LO650F001	EY-LO650F002	EY-LO670F001
Use	modu521, modu525 (from hardware index C)	modu525, modu530...590	modu525, modu550, 551, 571	modu525, modu550, 551, 571	modu525, modu570, 572
Power consumption	≤ 2 VA/0.7 W	≤ 1 VA/0.35 W	≤ 1 VA/0.35 W	≤ 1 VA/0.35 W	≤ 1 VA/0.35 W
Dissipated power	≤ 0.7 W	≤ 0.35 W	≤ 0.35 W	≤ 0.35 W	≤ 0.35 W
Current consumption	≤ 40 mA	≤ 20 mA	≤ 20 mA	≤ 20 mA	≤ 20 mA
Operation	6 switches (A-0-I), – 4 sashes (A-0...100%)		6 switches (A-0-I)	3 switches (A-0-II)	4 sliding switches (A-0...100%)
Indicator/display	4 LEDs (bi-colour), analogue: 8 LEDs (bi-colour)	16 LEDs (bi-colour)	4 LEDs (bi-colour)	4 LEDs (bi-colour)	8 LEDs (bi-colour)
Dimensions W x H x D	84 × 92 × 13 mm	42 × 92 × 13 mm	42 × 92 × 13 mm	42 × 92 × 13 mm	42 × 92 × 13 mm
Weight	0.07 kg	0.03 kg	0.03 kg	0.03 kg	0.03 kg

Accessories

Type	Description
0930240511	Front frame for 4 operating/indicating units
0930240540	Connection adaptor for RJ-45 operating/indicating units for front frame

Description of operation

The automation station (AS) and the I/O modules of the EY-modulo 5 series can be complemented with local operating and indicating units (LOI) to allow direct manual actuation or indication of system components.

Summary of functions

EY-LO625F001	Double unit used for operation and indication of the data points of the modu521 and modu525 AS (from hardware index C)	
	4 LEDs	LED indication, bi-colour, green/red (configurable for event/alarm/status)
	6 switches with LED indicator	Level Auto-0-I, green indication
	8 LEDs	LED indication, bi-colour, green/red (configurable for event/alarm/status)
	4 slide switches with LED indicator	Setpoint transmitter 0...100%, manual position indication yellow LED indication red (configurable for event/alarm/status)
EY-LO630F001	Single unit used for indication of the data points of the modu530...572 I/O modules or modu525 AS, or the novaLink connections of the modu590 novaLink module	
	16 LEDs	LED indication, bi-colour, green/red (configurable for event/alarm/status)
EY-LO650F001	Single unit used for operation and indication of the data points of the modu550, 551, 571 I/O modules or the modu525 AS	
	4 LEDs	LED indication, bi-colour, green/red (configurable for event/alarm/status)
	6 switches with LED indicator	Level Auto-0-I, green indication Manual position indication yellow
EY-LO650F002	Single unit used for operation and indication of the data points of the modu550, 551, 571 I/O modules or the modu525 AS	
	4 LEDs	LED indication, bi-colour, green/red (configurable for event/alarm/status)
	3 switches with LED indicator	Level Auto-0-I-II, green indication Manual position indication yellow
EY-LO670F001	Single unit used for operation and indication of the data points of the modu570, 572 I/O modules or the modu525 AS	
	8 LEDs	LED indication, bi-colour, green/red (configurable for event/alarm/status)
	4 slide switches with LED indicator	Setpoint transmitter 0...100%, manual position indication yellow LED indication red (configurable for event/alarm/status)

Intended use

This product is only suitable for the purpose intended by the manufacturer, as described in the "Description of operation" section.

All related product documents must also be adhered to. Changing or converting the product is not admissible.

Engineering notes

The automation station and the I/O modules of the EY-modulo 5 series can be complemented with local override and indication devices to allow direct manual actuation or indication of system components.

A local operating and override device can be added to an automation station or I/O module.

The function corresponds to the standard EN ISO 16484-2:2004 for local override and indicating units. Manual actuation and override of outputs by local operating units is independent of the user program sequence of the AS.

Fitting

The modu625 unit is fitted directly on the front of the AS (from hardware index C); the modu630...670 units directly on the front of the I/O modules or modu590 novaLink module.

All override and indicating units can be installed and removed during operation (hot-pluggable) without affecting functions of the AS or I/O modules.

Before a unit is inserted or removed, switches and sliders should be set to automatic mode to avoid triggering undesired switch actions at the outputs. When an operating unit is removed, all outputs are operated with the automatic values of the AS or I/O module. In each manual mode position, the status flag "overridden" is activated for assigned BACnet objects (AO, BO, MO).

If an incompatible I/O module is connected, the operating unit will not be operable; there is no risk of destruction. This state is indicated by the flashing of all LEDs (red and yellow).

Outputs of the AS or the I/O modules in manual position may change their status briefly when the user program is downloading.

Remote assembly

For external installation of the operating and indicating units, a front frame (accessory) can be used. This allows up to 2 modu625s or up to 4 modu630...670 units to be placed at a distance. The electrical connection of the AS or the I/O modules is made using a standard RJ-45 patch cable of category 5 or higher. It can be up to 10 m long. One cable is required for each remote modu6*. The cable can be connected directly to the modu521. On the modu525 and the I/O modules, a connecting adapter 0930240540 is required for each remote modu6*.

Labelling

The local operating and indicating units are labelled or numbered with function-specific symbols. Additionally, individual labelling can be made with a paper insert in the frontal transparent cap. The labelling is usually carried out using texts generated from CASE Suite, and the labels are printed on normal A4 paper using commercial printers.

LED indicators / function

LED indicators are selected or programmed with CASE Engine as an example of an alarm/status indicator, limit value indicator etc.

LED indicators

Use with modu530...572 I/O modules

LED indicators	Status	Description
No designation	Continuous green light / (flashing)	Channel active (status DI, BO, MO)
	Continuous red light	Channel active (alarm DI, alarm acknowledged)
	Pulsating red	Channel out of service
	Flashing red	Channel active (alarm DI, UI, AO – not acknowledged)
	All flashing red and yellow	No communication with I/O module or incorrect module type
	All alternating green-red/yellow-OFF	Lamp test active (priority indicator type)
	No indicator	Channel status "0", alarm "normal", no channel attribution, or power supply is not available
	Continuous yellow light	Manual operation channel (overridden AO, BO, MO)

Use of modu630 with modu590 novaLink module

LED indicators	Status	Description
No designation	Continuous green light	Field module connected, function OK
	Continuous red light	Error (e.g. short-circuited)
	All alternating green-red-OFF	Lamp test active (priority indicator type)
	No indicator	Field module not connected

Function allocation and LED indicators

Key

d: digital	LED for digital input (actuation configurable for alarm/event)
u: universal	LED for universal input (actuation configurable for alarm/event)
ov: out virtual	LED can be freely allocated (virtual actuation for alarm/event)
R: relay	LED for relay (normally open)
o: output	LED for digital output (open collector)
a: analogue	LED for analogue output (actuation for violation of limit value)
nl: novaLink	LED for novaLink channel
Number:	Channel number
